Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over U. S. Patent No. 7,144,365 to Bolling et al. in view of U. S. Patent No. 5,139,020 to Koestner et al.

3. Regarding Claims 1-5, Bolling teaches a method of monitoring the operation of a prothetic assist device, the method comprising the steps of: utilising a non invasive device to monitor or serially measure directly the blood flow through at least one heart ventricle; separately monitoring the blood flow through the prothetic assist device; combining said two measurements to determine an overall native to prosthetic flow index. (Abstract and Claim 1)

4. Bolling does not expressly teach that the measurement comprises continuous wave doppler flow monitoring of the heart.

5. Koestner teaches the use of continuous wave doppler flow for monitoring the heart. (Col. 1 lines 10-16)

6. It would have been obvious to one of ordinary skill in the art at the time of invention to modify Bolling with a set up of continuous wave doppler flow monitoring of

the heart as taught by Koestner since such a setup would result in more precise measurement of the cardiac output.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sanjay Cattungal whose telephone number is (571)272-1306. The examiner can normally be reached on 9:30 - 5:00 pm.
